DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Applicant refers to the claims in the description of the invention. Applicant must delete any reference to specific claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6-8, 10, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshino et al (US Patent 5151859).

Claim 1, Yoshino et al teaches a legged walking robot comprising a series of joints 10/12/14/16/18/20 install at each leg and a series of actuators 30/40/50/96/60/70 for driving the different joints, wherein the direction of the joints and the location of the actuators are shown for example in figure 3.

Claim 2, Yoshino et al describes in figures 1 and 3 how the output shafts of the different actuators are connected to each other.

Claims 3 and 10, Yoshino et al describes the joints being able to rotate in the x, y, and z axes.

Claims 6 and 13, Yoshino et al describes the ankle joint located towards a ground contacting end.

Claim 7, Yoshino et al teaches a legged walking robot comprising a series of joints 10/12/14/16/18/20 install at each leg, a series of actuators 30/40/50/96/60/70 for driving the different joints, and a series of speed reducers such as means 64/72, wherein the direction of the joints and the location of the actuators are shown for example in figure 3.

Claim 8, Yoshino et al teaches a legged walking robot comprising a series of joints 10/12/14/16/18/20 install at each leg, a series of actuators 30/40/50/96/60/70 for driving the different joints, a series of speed reducers such as means 64/72, and links such as 24/25 for connecting the different joints, wherein the direction of the joints and the location of the actuators are shown for example in figure 3.

Claim Objections

4. Claims 4, 5, 9, 11, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rina I. Duda whose telephone number is 571-272-2062.
